CM-1057

Dynamic Microphone Output Transformer

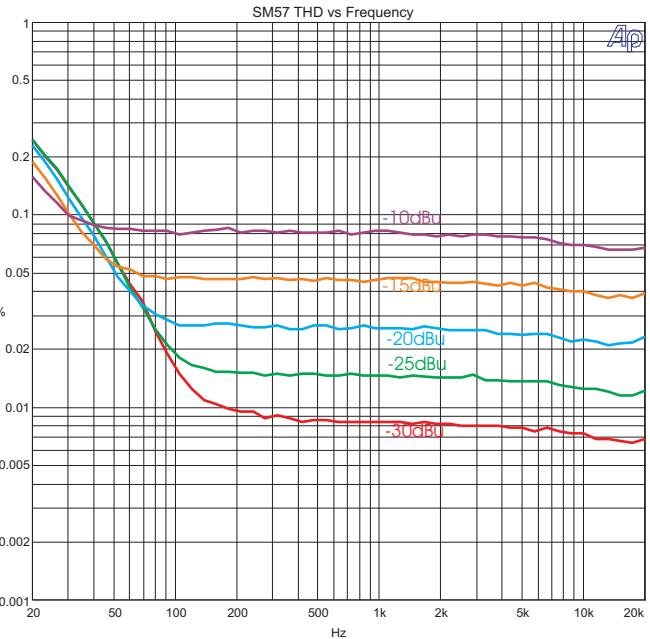

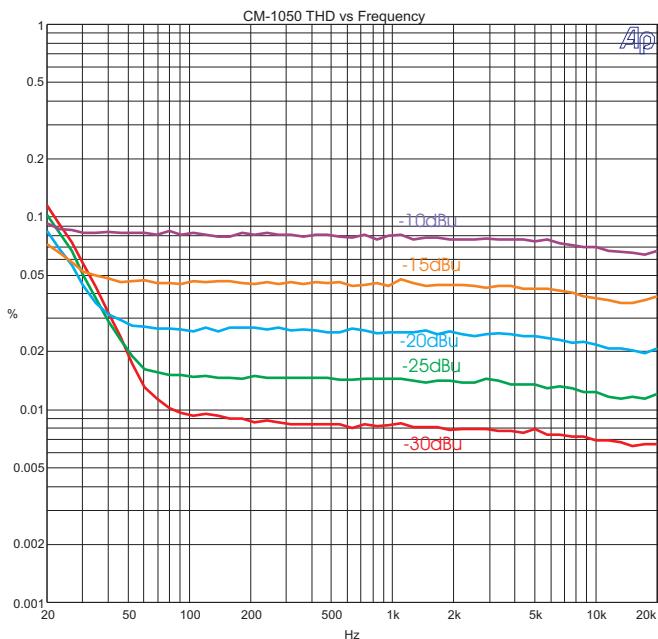

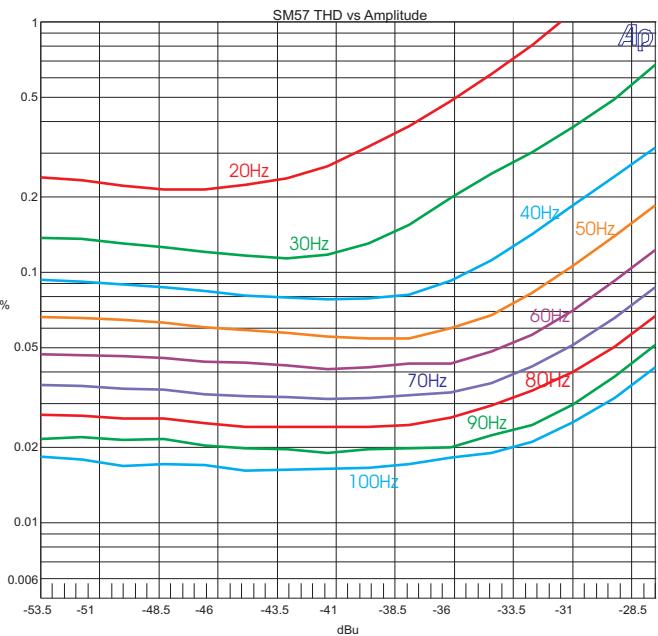

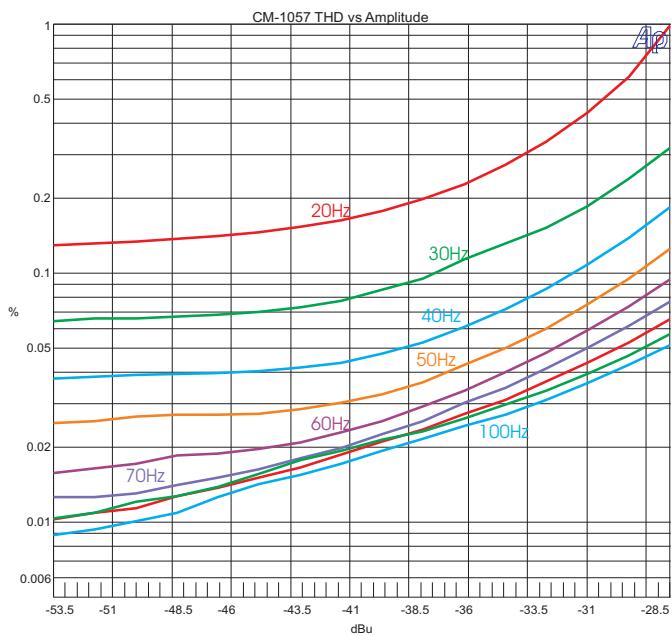

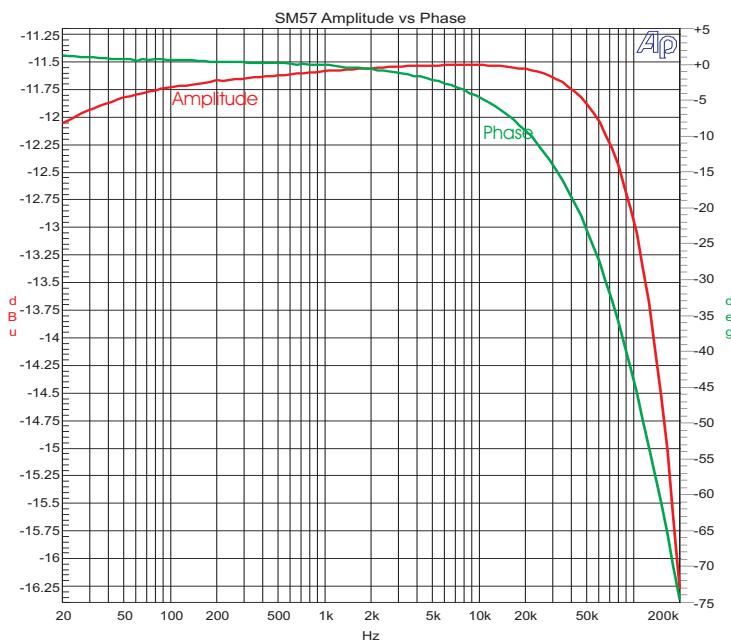

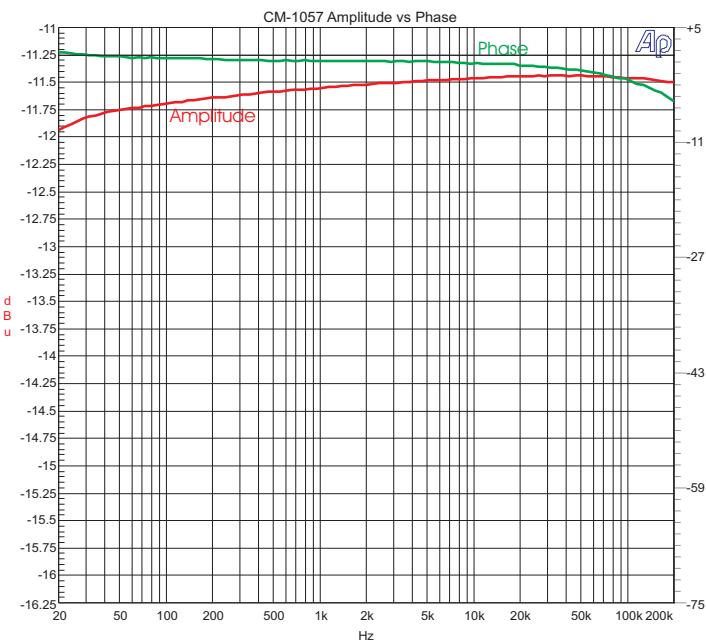

1 : 4 Step-up

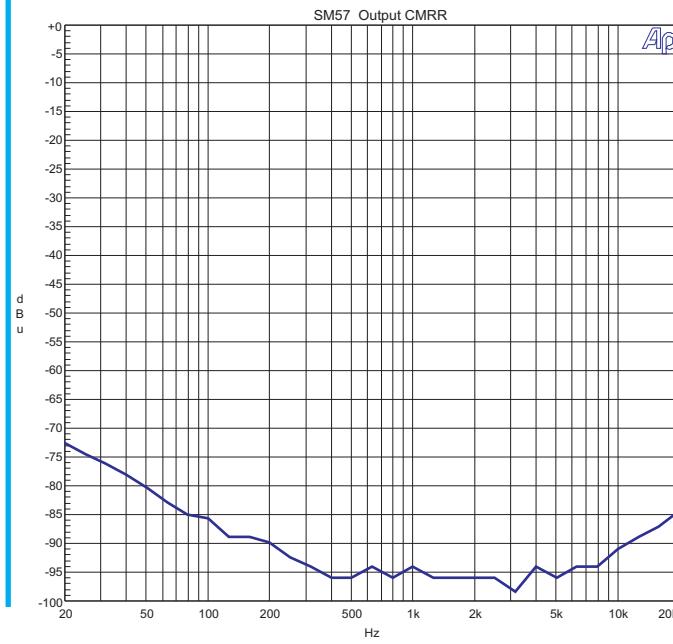

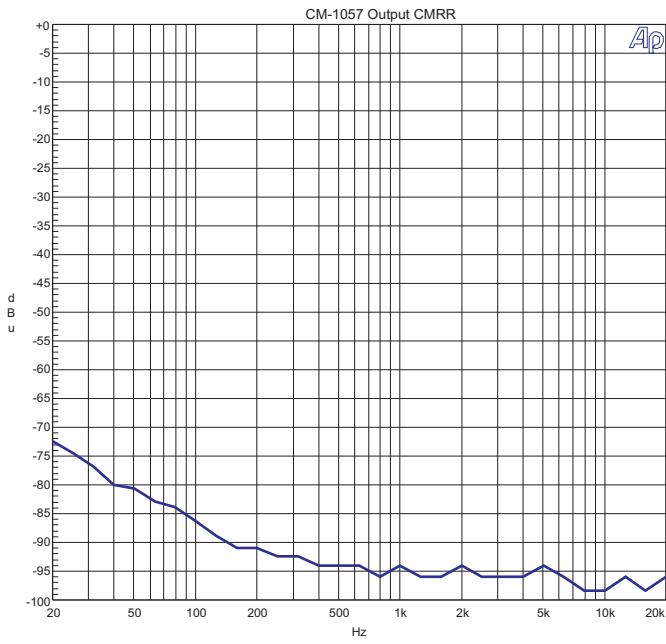

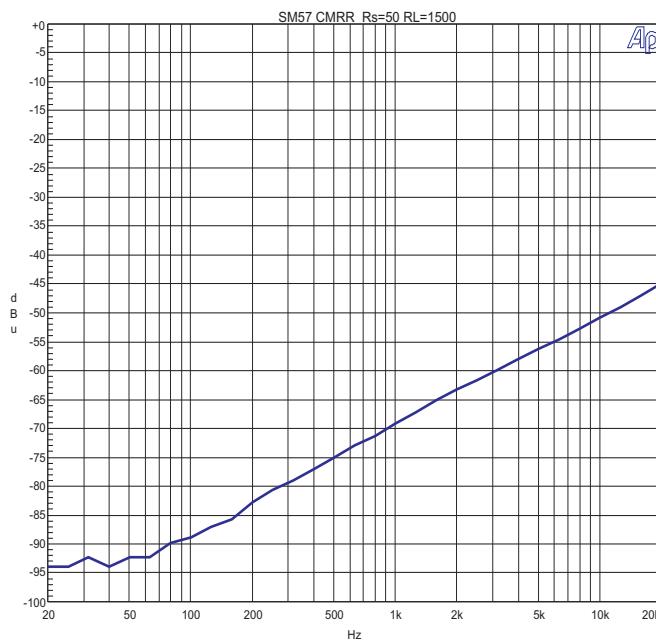

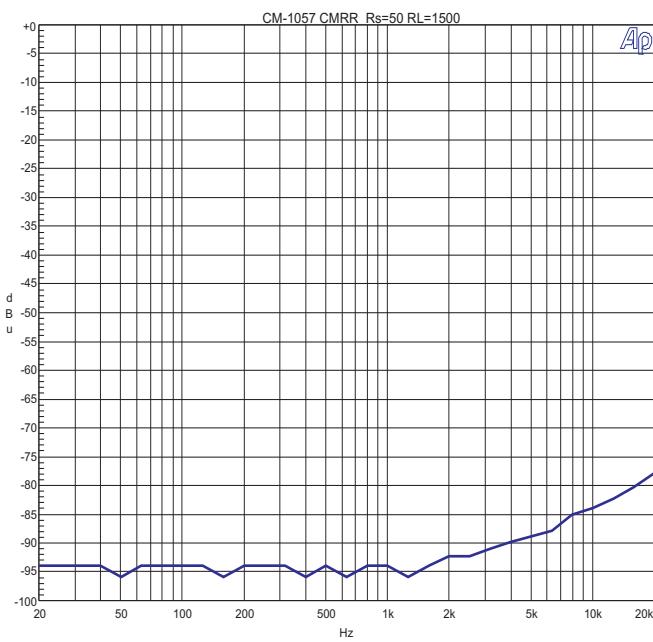

- Shure SM57 & SM58 output transformer replacement
- Superior bandwidth (+0.1 dB at 200 kHz, -0.5dB at 20Hz)
- Hum-bucking configuration
- Very good distortion characteristics
- Excellent CMRR
- +11.4 dB voltage step-up under load; 1:4 turns ratio
- Low profile package

The CM-1050 was designed as an output transformer for dynamic microphones such as the Shure SM57 and SM58. It has excellent bandwidth, common mode rejection ratio (CMRR), and very good distortion characteristics. The CM-1050 will readily fit inside the SM57 and SM58 mic bodies when the old transformer and its encapsulating materials are removed. It is hum-bucking making it very resistant to interference from stray magnetic fields.
