Moog Reintroduces Synthesizer IIIc Modular System

Moog Music today announced that it is reintroducing the **Moog Modular Synthesizer IIIc** system.

Like the **Emerson Modular System** and the **Moog Modular Systems** introduced in 2015, the Moog Modular Synthesizer IIIc system is built using the original documentation, art, and circuit board files and wherever possible, new-old-stock parts.

Each instrument features thirty-six hand-stuffed, hand-soldered modules, including ten 901-Series audio oscillators, the 984 Matrix Mixer, and the 905 Spring Reverb. All modules are mounted into two hand-finished, solid walnut console cabinets at the Moog factory in Asheville, NC.

"It's a privilege to build instruments in this way,"says Moog Production Engineer Anna Montoya. "It lets us reimagine what future tools can be. There is so much potential in this history."

Features:

- Limited edition of 25 systems
- Hand-wired using legacy parts and original assembly methods
- 901-series voltage-controlled oscillator
- Meticulous re-creation from original documentation, circuit board schematics, and art files
- Handcrafted using traditional manufacturing techniques
- 36 hand-stuffed, hand-soldered modules custom mounted and hand-wired in two hand-finished, solid-walnut cabinets
- 10 discrete 901-series oscillators (Moog's earlier, less stable design – not found in the later System 55, System 35, or Model 15)
- 905 Spring Reverb module
- 4 x CP3 mixers

- 984 4-channel Matrix Mixer (for parallel processing, includes dedicated bass and treble controls)
- 100% discrete design (no op-amps; not true of System 55, System 35, and Model 15)
- Built and behaves exactly like the original; exhibits the tuning instability and interference susceptibility inherent in the design
- Includes patch cables; 953 Duophonic Keyboard Controller available separately

Pricing and Availability

The **Moog Synthesizer IIIc** production is limited to 25 units and has a retail price of US $35,000. See the Moog **site** for more info.

SOMETHING TO THINK ABOUT

The introduction of a new kind of music must be shunned as imperiling the whole state; since styles of music are never disturbed without affecting the most important political institutions.

— Plato
